

Artificial Insemination PACKAGES 2026-2027

Frozen AI package: \$700 (discounted subsequent)

Fresh AI package: \$750

Our fresh and frozen A.I packages include:

- All scans (for 1 cycle) prior insemination, the insemination, and all scans post A.I including fluid/ovulation check and pregnancy tests at 14 days, 30 days and 45 days
- All drugs required to put the mare in foal
- Discounted Uterine sterile flush (and other reproduction procedures if required), pathology and Caslick if required
- 3 days agistment

It does not include:

- Travel
- Agistment for more than 3 days

All mares are different, and we don't know how long she is going to have to stay with us.

Before starting an AI package you need to have the stallion organised. For frozen AI, we need the semen at the clinic before we start scanning the mare.

*2nd cycles are \$50 off and our 3rd cycles are \$550 for frozen AI. It takes an average of 2 cycles to get any normal mare in foal and we want to encourage you to give her all the best chance. Please budget 3 cycles to breed any normal mares.

*We strongly discourage you from using fresh semen unless you can pick it up yourself. Couriers have been unreliable, and we do not take any responsibility for delayed semen arrival (which means the mare will likely ovulate before the semen arrives meaning no chance of pregnancy)
